## Pre K 4 News

### Writing

As we gear up to learn how to paint like Michelangelo painted the Sistine Chapel, each child wrote their name while laying on their back the way Michelangelo did for four years until the Sistine Chapel was complete. WOW!

### Reading

**GIANTS, GORGEOUS** paintings, **GRANDPARENTS**, remembering that **GRASS GROWS** on the **GROUND**, and talking to **GOD** are just some of the wonderful subjects that we have been reading about.

Your preschooler's vocabulary is expanding and their ability to sound out and read different words is such a testament to how smart they are and how eager they want to learn!

**Letters we are learning:**  
**Nn, Ww, Pp, Hh, Mm, Aa, Bb, Kk, Dd, Ff, Oo, Cc, Ee, Yy and introducing ... Gg!**

### Math

Counting planets, even dwarf planets like Pluto, is right on target with what our class is learning!

Counting factoids, including how many moons are surround Jupiter, how many hours it takes for the earth to rotate, and how old we would be if we lived on Saturn is a fun way to problem solve!

### Upcoming Events

**HTA Science Fair!**  
**Wednesday, February 23, 2011**  
**7pm to 8pm**

In the HTA wing of our Education Building Experience space from a preschooler's perspective – our solar system will never look the same to you again!

The universe, as far as we can observe it, is a wonderful and immense engine.
